Quantum Innovations Ltd.

Dear Ms. Morello,

I am writing to highly recommend Jane Potts for the summer internship program at Google. My name is Alisa Stones, and I serve as a Team Lead at Circuit Sphere Technologies. I had the privilege of supervising Jane during the Summer of 2021, and I am confident in her exceptional qualities.

Jane is not only extraordinarily organized but also showcases remarkable expertise in various technical domains. She has successfully utilized technologies such as Python, Java, and SQL to initiate and complete diverse projects.

Her dedication and excellence shine through in delivering outstanding technical results. With a keen eye for detail, she meticulously attends to even the most intricate aspects of her work, showcasing her thorough understanding of technical intricacies.

Motivated and quick to acquire new technical knowledge, Jane has proven to be a rapid learner, adeptly incorporating tools such as TensorFlow and Git during her time at Circuit Sphere Technologies.

Her collaborative spirit extends beyond effective teamwork to her ability to contribute meaningfully to technical tasks and projects. Her enthusiasm, dedication, and strong technical work ethic make her a standout candidate for your seasonal internship program.

I firmly believe that Jane's technical prowess, coupled with her commitment to success, positions her as a valuable asset to Google. Her technical proficiency along with her ability to excel in any technical role, make her an outstanding candidate for this internship opportunity. I wholeheartedly recommend Jane Potts for the internship at Google.

Best regards,

Amanda Smith
